## PROJECTS

### [Varsity Hub](#)

- One of the classes' top projects in relation to health services. "Varsity Hub" is a mock application platform designed to assist varsity level athletes with handling semesterly course loads and schedules. While focusing on simplifying communication between athletes and staff members (ex. Coaches, Medical Staff, etc.). Varsity athletes and staff can now easily communicate their whereabouts, injuries, make medical appointments and allow coaching staff to access medical reports of their players seamlessly. All at a glance in one unified application.

### [Drugs.com](#)

- "Drugs.com" was an interface redesign challenge that reimaged and explored improvements for its platform and application. The challenge gained notoriety as it was already a well establish domain and popular online drug information resource.

### [QCD](#)

- "QCD" was a Minimum Viable Product under the course theme: Neurotech. In which focuses on products that "combine digital technology with advanced neuroscience to rehabilitate, change or improve the human brain." (SFU, 2020). "QCD" focused on being a virtually accessible exposure response prevention (ERP) Therapy for OCD patients. In hopes to provide another therapy resource/format that is not readily available.
